Silver Appian Acquisition Accreditation Partner

USAF CON-IT

- CON-IT is DoD's Gold Standard CWS
- Scope: Architecture, DevSecOps, DBA, Agile, BPM, SME, OEM Support

NASA Contract Management System

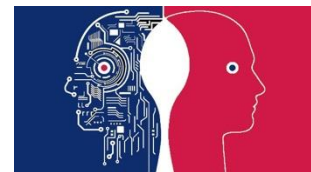

- Accelerated with CALM Baseline
- System Integrator for NCMS modernization
- Scope: Architecture, Cloud, SME, Training, DevSecOps, Agile, BPM, Dev, OEM Support
- Target MVP within 1 year!

HHS CMS CALM

- Refactored and Federalized CON-IT baseline for usage in the AWS GovCloud
- Scope: Arch, DevSecOps, DBA, Agile, BPM, Dev, Test, OEM, HCD, SME, Training
- Includes: Contracts, Requisitions, RMS, Clause Logic, Solicitation, Source Selection, AMS, Vendor Mgmt, P-Card, and Contract Closeout
- Most complete acquisition/contracts system solution in the government!

Chatter Analytics Decision Engine (CADE)

A HumanIT's SBIR Analytics Technology that combines a unique blend of data, custom algorithms, and business intelligence to maximize the strategic value of organizational information to accelerate and improve the decision-making process. CADE provides on-demand reporting that optimizes leadership's ability to make strategic mission impacting decisions with confidence.

CADE SBIR Extensions:

- CADE-O: Optimization
- CADE-P: Portfolio Analysis
- CADE-C: Capability Analysis
- CADE-S: CyberSecurity

Small Business Innovation Research (SBIR) Information

The SBIR program is a competitive initiative established by Congress in 1982 to encourage small businesses to engage in Federal Research and Development to solve Governmental challenges.

- Phase I – Determines the scientific and technical merit and feasibility of a proposed effort
- Phase II – Typically a demonstration phase in which prototypes are built and tested
- Phase III – Work that derives from, extends, or completes a SBIR Phase I or II capability

Benefits of a SBIR Phase III Award Include:

- Acts as Sole Source fully justified by Phase I and II Small Business competition
- No workshare requirements – Ability to partner with both small and large businesses
- May be used to acquire a wide variety of solutions fulfilling a broad range of requirements
 - Products, Production, Services, Integration, Research, and Development
 - Services and Materials can be acquired on the same contract
 - Scope: Cloud Migrations, SW Dev, Prototype, DevSecOps, Production, Cybersecurity
- Non-Protestable, All colors of Funds (except SBIR \$) -- Contract Types: CP, T&M, FFP, etc.
- Supports contracts at all Security Classification levels across all Federal Agencies

Be on contract with us in as little as 45 days!

Business Case: Utilize our SBIR technology with the CON-IT or CALM baseline of Appian contract/acquisition system. MVP can be up and running within 1 year. Reducing risk, SAVING your organization Millions of dollars, years of development and acquisition!
